

Wind turbine facts and figures

Wind Power Facts. Today more than 72,000 wind turbines across the country are generating clean, reliable power. Wind power capacity totals 151 GW, making it the fourth-largest source of electricity generation capacity in the country. This is enough wind power to serve the equivalent of 46 million American homes.

In 2023, the total wind power capacity installed worldwide surpassed one terawatt, growing by more than 100 gigawatts in comparison to the previous year. China is the leading country in terms...

More than ten countries now have a wind power share of more than 20%, led by Denmark, which generates an astonishing 56% of its electricity from wind. Germany, the Netherlands, Portugal, the UK and Uruguay are among the countries that generate around a third or more of their electricity from wind.

The report highlights increasing momentum on the growth of wind energy worldwide: Total installations of 117GW in 2023 represents a 50% year-on-year increase from 2022; 2023 was a year of continued global growth - 54 countries representing all continents built new wind power

Statista R identifies and awards industry leaders, top providers, and exceptional brands through exclusive rankings and top lists in collaboration with renowned media brands worldwide. For more details, visit our website.
