

Www epirocgroup com

New ideas come from people who see opportunities instead of obstacles. Those who dare to challenge the status quo and are not afraid of failure. They constantly seek ways to improve things. Do you want to help us change the mining and construction industry? It all starts with people. People like you.

"I am proud of our vision, "Dare to think new". It guides us to always consider doing things in a better way and not being satisfied with following others. Sometimes we make mistakes - then we learn from those and continue growing. When we combine this attitude with our culture and our core values - innovation, commitment and collaboration - we will do big things together. And big things is what we aim to do. Together all our passionate colleagues are driving the productivity and sustainability transformation in our industry. Welcome onboard!"

Innovation is a significant attribute of Epiroc. We are creative and entrepreneurial and constantly seek to improve in everything we do. Our innovative spirit is part of who we are and a key method to achieve our goals.

We are committed to meeting and exceeding our customers' expectations on partnership and productivity. We always work hard to understand customers' needs and to earn their trust through industry-leading quality and reliability.

We believe in close collaboration with customers, business partners, colleagues and other stakeholders. Our working culture is service minded and action oriented, with a strong devotion to customers.
